

2006 Edition *the Source*[®] is here!!

2006 Edition
the Source[®]

An Interpretation of the Codes
and Standards for Safety Glazing

The latest edition of the all new and enlarged *the Source*[®] is now at the news stand. The only glass and glazing interpretation in the U.S. The entire Chapter 24 is reprinted in *the Source*[®] with illustrations and interpretations. All other chapters referring to glass are included in this publication.

A must for every professional glazier, building official and architect.

..... More industry standards.

..... Complete standards and drawings for accessible entries.

..... The interpretation and guesswork is gone!

..... How to determine strength of baluster panels.

..... When may the top rail be omitted on a railing?

..... When should mirrors be safety backed?

..... When is wired glass permitted in a door?

..... Should all doors be safety glazed?

When should glass thickness be increased to reduce deflection under average load?

..... Does L/175 refer to glass deflection?

..... Should both panels of a set of doors be replaced when one is broken?

These and many more problems are answered in 2006 *the Source*[®].
